

10,702

source observations
across 45 snapshots

6,304

unique artifacts in the
cumulative evidence graph

1,283

searchable benchmark
records, including unscored

4

catalog sources
with source labels retained

Benchmark Radar brings daily discoveries, catalog search, model-report adoption, and sourced scores into one place. Each count measures a different kind of evidence.

Data cutoff: 2026-09-06. Catalog records and discovery observations are separate units.
